Signature and stamp	<u>[Signature]</u>		

THE FOLLOWING ARE VERY COMMON AFTER VACCINATION:

- Pain, tenderness or swelling where the injection was given
- Feeling tired, having a fever, or chills
- Joint and muscle pains
- Feeling sick or vomiting
- Headaches
- Feeling unwell in other ways.

These are usually mild and go in a day or two. If you are worried about these, if they are severe or not going away, make sure you tell the staff at the vaccination centre or call 1025.
